

LEVEL 12 ACCOUNTING

This full-colour, consumable elective course comes complete with ten individual motivating work-texts and a helpful teacher's guide. And topics studied are what the student will need to know in real life! Flexible, self-paced lessons cover concepts like transactions, posting items to a ledger, worksheets, financial statements, recording payroll, taxes, and more! Designed for grades 7-12, this math elective is a wonderful supplement for students who want to pursue a math or accounting degree, own a business, or enjoy money management. And instead of one huge, intimidating textbook, this encouraging course is divided into ten separate work-texts to encourage student learning!

But there's more! To aid comprehension, this step-by-step course emphasizes mastery learning techniques so students can work independently with confidence! Daily instruction and application as well as quizzes and tests for evaluation are all included. Try this best-selling, Bible-based curriculum to see how fun learning accounting can be.
